— FRANCE —

« Wether musical or human,  
the movement marks tempo and motion »

« In my research, rhythm falls in line with motion, then separates in order to even merge better. Finally they will land on material. Once created, the graphics invites to reading more than watching and is therefore comparable to a partition of music or a book.

Some will see a crowd of people, moving on a Jazz Symphonie, whereas others will see silhouettes walking through the early morning fog.

Non is mistaken, because we are free to interpret as we wish. My works are only men's stories that I am writing inexhaustible for over 20 years. »

*Georges Le Fur*

MOUVEMENT 15

This piece of furniture, Mouvement 15, is made out of Krion.

Krion is a material that is warm to the touch and similar to natural stone. It is made of two-thirds natural minerals (ATH – aluminium trihydrate) and a low percentage of high-resistance resins. This composition gives KRION™ a number of exclusive features: it does not have any pores, it is anti-bacterial without any type of additive, it is hard-wearing, highly resistant and easy to repair, only requires minimum maintenance and is easy to clean. Thanks to its solid surface, every types of stripes, microcomputing or deep, can be eliminated by a simple sanding in the paper 500.

The material allows to cut the sheets, connect them and thermoform them to create curved sections, and can even be injected during the production process, making it possible to create different designs and projects that are impossible to achieve with other materials.
